

The Club: introduction

"Well what do you think about the result ? Doesn't I look great" There she stood proud looking in the mirror. I was standing behind here and indeed, she looked great. She was now one of us. Just like me, she had wings and here middle was encapsulated in a insect like corset. The only difference was that here latex leggings were still just above here knees and my legs are already fully covered in the tight fitting latex. She was so proud now, of being a real member of the club that she just didn't stop exposing herself to the other members. An intense pleasure for here.

I'll tell you a bit how the club works. You can see me in the picture at the night standing at the background. Just behind the women which so proudly became a real member. We have a strict dress code and also a strict physical code. If you are rich, maybe a bit bored and want to do something totally new and different in your live, the club is the place to be. The club is dedicated to live and living it.

Aspirant members do get time to joy the pleasures of the membership without being transformed. Strictly for women of course, men have there own clubs.

When an aspirant member goes for full membership she will be transformed by us, the club.

Of course aspirant members have to dress themselves in a tight body, just like the photo shown at the left. The body needs to be accompanied by latex leggings. Once you are dressed like this and behave yourself nice and submissive a training will help you thinking in the way a real club member should do. Hypnosis helps a lot to speed up the adaptation process. Especially the first weeks. We just hypnotize you. You will be just like a doll. You will hear everything, but you can't move. You will feel everything but you can't act. You will obey the club members if you like it or not. But don't be afraid, you will like it, simply because we say you have to. You only have to respond as a normal doll would do. Because you are hypnotized you don't have to think, we will take care of that.

Some members are the first few weeks furniture. Others will be mounted on special frames with wheels and tubes and we just tell them that they are a vacuum cleaner.

Personally I also like to let them believe that they are not human but old fashioned mechanical robots with an on / off switch at their back.

We even had members which refused to behave human again. We reprogramme

them by telling that they are upgraded to live size latex dolls, having human skills. Strangely enough it turns them even more on.

If the aspirant members are adapted properly it is time for the next phase. Because live is enjoyable we always misuse this event for a little ceremony. Simply wrapping here in a cocoon. Add genetically modified latex juice and chitin and the results is astonishing. The members love to see the reaction after the transformation.

You can recognize the juvenile full members at the amount the body is covered with latex. It grows. It grows slowly. Starts with covering your legs. You can see it, touch it gently, adore it. Growing towards your crotch in a few months. And to be honest also growing inside the crotch. Its nice. No problems with that.

You will ask yourself, what about the husband ? Well somebody has to pay the bills and do the work. He can only be proud when his wife returns in this fantastic fantasy creature. He won't have time for a penopause !

Well, but I was telling about the transformation process. The senior members in the club are, except for the head, fully covered with soft shiny latex. I have to say that also our eyes are a sort of mysteriously black. Can you undress yourself from the latex you ask me? I can only give you one answer: No, should you???

The wings are a story of it's own. Beautiful, aren't they and yes we are able to use them and fly for short distances.

It makes us look like life size fairies, it makes us more special. It is also not the only insect part in your transformed body. The pleasant side effect of using interesting parts of insects in your body is that you can experience the world around you in a totally new and exciting way. Thanks mainly to the antennas on our head. Makes it possible to communicate in a whole new way and, a bit naughty, to experience each others bodies in a more intense way. For daily live outside the club, nature found its way: we can fold our wings at our back, underneath clothes and the antennas can be bent, gently of course because they are very sensitive, covered by hair, also to our back.

Next time I will tell you more and show you some pictures of other club members.
